EDUCATION

Bachelor of Science in Computer Science + Advertising, University of Illinois Urbana-Champaign

May 2027

- **GPA:** 3.93/4.0
- **Honors & Awards:** Deloitte UIUC Case Comp (2nd), OTCR Case Comp (1st), Rocket Mortgage Case Comp (3rd)
- **Coursework:** Data Structures, Algorithms, Software Design, Statistics, Computational Linear Algebra

EXPERIENCE

Product Manager Intern, Capital One

06/2026 — 08/2026

- Owned product strategy for an AI ETL workflow saving **\$80K** and 400+ engineering hours annually across 20 teams and 100+ users
- Identified unmet user needs through interviews and workflow analysis, translating insights into PRDs, OKRs, and roadmap priorities
- Prioritized 3 intake flows for new datasets and schema changes, balancing user impact, engineering effort, and delivery risk
- Partnered with 10 engineers to automate technical specs and ETL code generation, cutting pipeline delivery from months to days

Product Lead, DapUp (NIL Marketplace Startup)

06/2025 — 09/2025

- Defined product roadmap and PRDs for core features connecting **100+** athletes with brands, reducing campaign setup time by 30%
- Iterated Figma prototypes through 15+ user interviews, refining MVP features and campaign workflows before launch
- Built and shipped wallet, analytics, and campaign dashboards in React and Firebase, enabling end-to-end campaign management

Advertising Operations Intern, Rocket Mortgage

05/2025 — 08/2025

- Automated parsing of 1.5M+ daily Segment events using async JS, enabling lead deduplication and saving **\$300K+** in ad spend
- Developed ML scoring pipeline (scikit-learn + LLM) analyzing 100K+ Amplitude sessions to predict loan closures with 92% accuracy
- Validated measurement logic across 4 marketing teams using AWS Athena (SQL), improving multi-touch attribution accuracy by 35%

Product Manager, HackIllinois (Mobile App)

09/2024 — 05/2025

- Drove zero-to-one development of the HackIllinois mobile app for **750+** attendees, owning requirements, prioritization, and launch
- Coordinated a 10+ person design and engineering team to ship authentication, deep links, maps, QR check-in, and event tools
- Launched duels, an item shop, and leaderboards, increasing attendee participation in event activities by 30%

LEADERSHIP

Co-Director, HackIllinois

04/2026 — Current

- Managed 50+ student organizers across 5 cross-functional teams to deliver hackathon experience for 750+ attendees
- Owned roadmap and execution for attendee-facing products, including registration, check-in, logistics, and on-site experience
- Partnered with engineering, design, operations, and sponsorship teams to prioritize features and unblock launch risks

Vice President, Product Space UIUC

01/2026 — 06/2026

- Built and taught a semester-long PM fellowship for 80+ members, creating 12 lessons and averaging 30+ attendees per session
- Managed a 10-person leadership team through weekly planning, setting the semester roadmap and coordinating workshops and speakers
- Advised YC startup founders on web product strategy, presenting a Framer redesign optimized for UX, SEO, and GEO

Founder, Rebels Wrestling (YouTube)

06/2020 — 06/2024

- Produced 300+ NCAA wrestling videos, growing to 7K+ subscribers and 4M+ views through SEO and content analytics
- Monetized brand through **\$10K+** in ads and sponsorships, using data insights to increase click-through rate by 25%

SKILLS

Languages: Python, TypeScript, Java, C++, SQL, Swift, JavaScript (React.js, Vue.js)

Tools & Platforms: Firebase, AWS, Postgres, Power BI, Tableau, GA4, Amplitude, REST APIs, Figma, Confluence, Framer, Jira

Product & Data: Customer Discovery, PRDs, Product Strategy, Roadmapping, Prioritization, OKRs, Product Analytics
